Experience

Full-Stack Developer, PGH Wong Engineering, Inc. – San Francisco, CA, USA Jan 2025 – Jul 2025

- Led modernization of legacy internal systems, enhancing UI/UX with responsive frontend components using JavaScript, HTML, CSS (Bootstrap).
- Designed and developed scalable backend services in .NET and C#, streamlining data processing and improving platform performance.
- Collaborated with cross-functional teams to integrate new features, reduce load times, and improve development workflows using Git and Agile practices.
- Produced detailed technical documentation covering architecture, configuration, and deployment steps to support knowledge transfer and future maintenance.
- Conducted code reviews and contributed to best practices, ensuring maintainability, security, and performance across the full stack.

Freelance Frontend Developer, Soporte SA – Medellín, Colombia Mar 2024 – May 2024

- Developed a marketing-focused website for a tech services company using Next.js and Tailwind CSS, delivering a fast, accessible, and mobile-first design.
- Collaborated with the client to align the site's identity with their business goals and optimize service presentation.
- Delivered on-time deployment with clean architecture and easy future scalability.
